

Safer ocean access at Mallacoota

The new boat ramp and breakwater will dramatically improve the launching of recreational and commercial vessels and vehicle parking facilities.

For over 20 years, efforts have been made to provide an upgrade to the existing ocean access boat ramp at Bastion Point, Mallacoota. The existing ramp is of poor quality, unsafe and provides a poor level of service.

In January 2013, the Victorian Minister for Environment and Climate Change, Hon. Ryan Smith MP, granted Coastal Management Act consent to East Gippsland Shire Council to proceed with the Mallacoota Ocean Access Boat Ramp project.

The consent under the Coastal Management Act, together with a funding commitment by the State Government, now means that Council can proceed with preparation of tender documentation for construction of its preferred model, known as Option 3B.

The new boat ramp and breakwater will dramatically improve the launching of recreational and commercial vessels and vehicle parking facilities.

The construction includes an upgraded car and trailer parking area, a formalised access road and a new two-lane boat ramp with protective breakwater.

Extensive community consultation has been undertaken over the decades since a new ocean access boat ramp was first mooted, and Council will continue to keep the community informed of progress during the project construction phase

The Mallacoota Ocean Access Boat Ramp Community Advisory Committee (MOABRCAC) will continue its involvement to ensure a balanced oversight of the project throughout construction.

The overall project scope consists of the initial construction phase, followed by ongoing operation of the facility by East Gippsland Shire Council.

Tenders for the project will be called in April 2013.

The consent under the Coastal Management Act, together with a funding commitment by the State Government, now means that Council can proceed with preparation of tender documentation for construction of its preferred model, known as Option 3B.

The existing ramp is of poor quality, unsafe and provides a poor level of service.

Did you know?

A recent State Government review of the project rejected low-key options due to their inability to meet relevant design guidelines and usability.

- Animal registration and renewals
- Planning
- Collecting applications and lodging permits
- Community laws and health
- Enquiries about adjoining fence owners
- Change of address
- Disability Parking permits
- New or replacement waste bins
- Raymond Island ferry passes
