

the mallacoota mouth (10th June 2010) - 1374

ments made in public and parliament about what the community's opinion is, then those statements are justified. If there is no proof to support statements about what the community's opinion is, then those statements are not justified. It is not fair that Mr. Davis, an individual, or a small group of the community speak on behalf of what the whole community think about the Parks Office unless they have the proof and support of the community. And in this case there is no proof or support from the whole community.

Annie Watkins

Our apologies to Annie for not marking a press release from Phillip Davis more clearly. We will do so in future - Ed.

And finally another item from Geoff Coles.

Ugly Stuff!

Dear Editor,

Can someone please tell me what type of persons in this town have successfully intimidated our local traders from displaying anything connected with the Save Bastion Point Campaign ?

Even advertising a public meeting open to all is enough to attract threatening phone calls and intimidation. (ask our traders if this is true).

We well remember when the town's self-appointed censors went into the shops to tear out offending pages from the Holiday Mouth which depicted an accurate scale aerial view of the proposed Option 3b and forced the traders to stop selling that edition!

What would happen if someone defied this heavy overbearing tactic, and was courageous enough to display an SBPC poster?

--- Krystallnacht?

Apparently, Democracy is only of value if it works in your favour.

Your opponents are only "Rent-A-Crowd" and unworthy of 'Your Democracy'.

Sincerely, Geoff Coles
